

Vilkår for de frie geografiske data, som Styrelsen for Dataforsyning og Infrastruktur stiller gratis til rådighed.

Styrelsen for Dataforsyning og Infrastruktur har i henhold til ophavsretsloven ophavsret til alle styrelsens kort, data, produkter og services.

De geografiske data inkl. GeoDanmark, skråfotos og Danmarks højdemodel kan frit anvendes af borgere og den private sektor både i kommercielle og ikke-kommercielle sammenhænge. For den offentlige sektor betyder det, at data frit kan udveksles med borgerne og virksomheder, og der kan laves løsninger, hvor data videregives til 3. part.

[Gældende vilkår for brug af frie geografiske data.](#)

Valg at CC BY 4.0 licens skal gælde for frie geografiske data.

Du kan som anvender vælge, at CC BY 4.0 licensen skal gælde for brugen af frie geografiske data i stedet for [styrelsens vilkår](#). Det gælder dog ikke for GeoDanmark data.

Vælger du, at CC BY 4.0 licensen skal gælde for brugen af data, skal du overholde de vilkår, der gælder for CC BY 4.0 licensen. Vær opmærksom på, at nogle af vilkårene i CC BY 4.0 licensen er mere restriktive end de vilkår, Styrelsen for Dataforsyning og Infrastruktur tilbyder i styrelsens vilkår.

[CC BY 4.0 licensen kan findes her](#)

Terms for the free geographical data that the Agency for Data Supply and Infrastructure makes available at no charge.

Under the Copyright Act, the Agency for Data Supply and Infrastructure has copyright to all the agency's maps, data, products and services.

The geographical data incl. GeoDanmark, oblique aerial photos and Danish elevation model can be used freely by citizens and the private sector in commercial and non-commercial contexts. For the public sector, this means that data can be freely exchanged with citizens and companies, and solutions can be made where data is passed on to third parties.

[The prevailing terms of use of this data can be found on this page.](#)

The choice of the CC BY 4.0 license must apply to free geographic data.

As a user, you can choose that the CC BY 4.0 license should apply to the use of free geographical data instead of [the terms of the agency](#). However, this does not apply to GeoDanmark data.

If you choose the CC BY 4.0 license to apply to the use of data, you must comply with the terms that apply to the CC BY 4.0 license. Please note that some of the terms of the CC BY 4.0 license are more restrictive than the terms offered by the Agency for Data Supply and Infrastructure in the agency's terms.
